Re: Kane County Zoning Petition 4535 – Special Use for Dog Kennel

Ladies and Gentlemen:

In reviewing the document sent by Mr. Thornhill it is my understanding that the following more detailed stipulations were discussed and should be incorporated:

1. Under "Provisions for 24-7 Vigilance" it should be clear that the outdoor housing of dogs should be between 8 am and 6 pm.
2. The location of the individual custom made suites should be clarified to be "indoor".
3. Under "Building Construction and Fencing" it should be clarified that the soundproofing should be sufficient to eliminate sound emanating from building.
4. Under the "Waste Removal Plan" the plan should remove not only smells from feces, but also urine.
5. It should be clarified that the approval of the final design shall be subject to Kane County Health Department specifications.
6. The previous issues with respect to drainage and ground water should be added.

If you have any questions, please call.

John J. Hoscheit
