PRESS RELEASE

McLean Blvd. (Bowes to Hopps/Spring St.) Construction of New Northbound Traffic Lanes

Weather permitting the contractor will begin placing asphalt to build the new northbound traffic lanes on McLean Boulevard the week of June 2nd. The paving is expected to last about 2 weeks. Traffic will be controlled by flaggers that will be stopping traffic at various points in the operation to allow trucks and equipment access to the construction areas. Please allow for longer than normal delays and allow for increased travel times. Limited use of McLean Blvd or use of alternate routes may be advisable. To promote your safety and the safety of construction workers please be alert and exercise caution while traveling through the work zone.

Concerns about the project should be addressed to Dave Boesch at 630-845-7875.
