FOR IMMEDIATE RELEASE

From: Jessica Mino, Kane County Resource Management Coordinator

## **Kane County Selects Dynegy Energy for Electrical Aggregation Program Renewal**

Kane County has entered into an agreement with Dynegy Energy Services, LLC for electricity supply for residents and small commercial businesses in unincorporated portions of the County, excluding Aurora and Dundee Townships.<sup>1</sup> Dynegy offered the lowest pricing in a competitive bid process. Dynegy, located in southern Illinois, has served over 500 municipal electric aggregation programs.

The new fixed rate is **7.026 cents per kWh** for 24 months ending August 2020. This is a decrease from Kane County's current electrical aggregation program rate of 7.08 cents. Meanwhile, the ComEd default rate to compare increased on June 1 to a projected annualized rate of 7.75 cents.

The average participating ratepayer may anticipate 95 dollars in savings for the first year of the two-year term. With Kane County's Electrical Aggregation Program, there is never an early termination fee, switch fee, nor monthly fee; ratepayers may vacate at any time to switch to another supplier or ComEd default service.

Residents and small businesses currently enrolled in the County's program, or who receive default service from ComEd, will automatically receive the lower rate at meter read dates in August of 2018. The new rate will be reflected on ComEd bills dispersed in September. These ratepayers will receive an opt-out notice to remove themselves from the program if they so choose.

Ratepayers in unincorporated Kane County who have entered into a private contract with an alternative supplier will receive an opt-in notice allowing them to enroll in Kane County's electrical aggregation savings program.

Ratepayers enrolled with other suppliers may join the program by calling Dynegy at 844-351-7691 Monday through Friday, 8:00am to 7:00pm. They must provide their ComEd account number to enroll. It is recommended those ratepayers first check with their supplier to determine whether they will be subject to an early termination fee upon cancelling their current contract before making the switch.

All ratepayers, those automatically enrolled and those who opt-in to the program, will have the option of receiving 100% renewably-sourced electric supply at a rate of **7.248 cents per kWh** from August 2018 through August 2020. Please contact Dynegy to elect this sustainability option.

---

<sup>1</sup> Voters in unincorporated Aurora Township and Dundee Township passed referenda in November 2012 allowing their respective Township Boards to establish an electric aggregation program in those jurisdictions.
