**Subject:** EX: Solar Farm Proposal #4616

Good evening Mark, I am writing a brief email to voice my opposition to the solar farm that has been proposed very close to our subdivision. My husband and I live at 1N438 County Life Drive on the north side of the Pine Tree Subdivision. From where our house is located I know that we would not have to view the solar farm but I certainly feel bad for my neighbors who would see it. In addition to the decreased property value they would face, there is the concern for safety. There is no ingress/egress to this property for emergency purposes. While I know fires are not likely, they have happened and I feel it would be irresponsible to allow construction of this magnitude when there are no safety precautions in place. Fires could spread extremely quickly through the fields and right into our subdivision. It's concerning. In closing, would you want to look out your windows at a solar farm? There are better places for this solar farm to be constructed.

Thank you for your time...Happy Holidays!

Pamela Banbury

(I just sent this to all the board members)
